# My Tech Journey

In January 2024 I started out my tech journey by enrolling in the Uncommon.org tech bootcamp.

Scratch

learned scratch a coding application that uses blocks of code so that i can empower kids in my community with basic coding knowledge.

Woofjs

Woof.JS is similar to scratch and its a low level JavaScript that i use to teach youth in schools how to create 2d games for free.

UX/UI design

advanced my tech carrier into learning UX/UI design. Now i have the ability to design mobile applications, esthetic flyers, modern looking with great user experience websites.

Web development

I got excited about bringing my designs to life. I mastered web development all the HTML , CSS and JavaScript. Working towards becoming a full stack developer.

Digital marketing
